

Lab-8

we will create two threads, one:
Thread displaying "BMS College of Engineering"
one every 10 seconds and another displaying
"CSE" one every two seconds.

```
class BmsThread extends Thread {
```

```
    @Override
```

```
    public void run() {
```

```
        while (true) {
```

```
            System.out.println("BMS College of Engineering");
```

```
            try {
```

```
                Thread.sleep(10000);
```

```
            } catch (InterruptedException e) {
```

```
                e.printStackTrace();
```

```
            }
```

```
        }
```

```
    }
```

```
class CseThread extends Thread {
```

```
    @Override
```

```
    public void run() {
```

```
        while (true) {
```

```
            System.out.println("CSE");
```

```
            try {
```

```
                Thread.sleep(2000);
```

```
            } catch (InterruptedException e) {
```

```
                e.printStackTrace();
```

```
public class ThreadExample {
```

```
    public static void main (String[] args) {
```

```
        BmsThread bmsThread = new BmsThread();
```

```
        bmsThread.start();
```

```
        CseThread cseThread = new CseThread();
```

```
        cseThread.start();
```

```
    }
```

Output:

```
BMS College of Engineering
```

```
CSE
```

```
CSE
```

```
CSE
```

```
BMS College of Engineering
```

```
CSE
```

```
CSE
```

```
CSE
```

```
CSE
```

```
BMS College of Engineering
```
